Overview

AERO-BIZ can demonstrate over 40+ years of knowledge and experience gained across such approvals as EASA Part 145, Part 21G, Part 21J, FAR 145, Part 66, Part M and ISO 9001 /EN9100 in many types of organisations from medium size and start up companies, to corporate internationally recognised companies.

The company has had vast exposure to many regulatory authorities in countries in Europe such as, UK, France, Germany, Spain along with international approvals for the USA, China, Australia, Bermuda and Nigeria etc.

The customer base as well as regulatory authorities, reaches out to many types of A/C OEM's such as Airbus, Boeing, airlines and 1st tier suppliers on both Fixed and Rotary wing aircraft.

Our port folio extends to both Military and Civil applications.

Aviation Experience

- Recognised regulatory form 4 post holders under the EASA regulatory scheme for Maintenance (MRO), Production and Design approvals.
- Independent Regulatory and Business System advisors covering EASA Audit and Design System Monitoring.
- Familiar with engineering license requirements in accordance with EASA Part 66.
- Working in accordance with relevant regulatory system requirements such as, TSO, ETSO, MOR, AD's etc
- EASA Regulatory experience covering many aspects of aerospace disciplines on both Fixed wing and Rotary wing aircraft.

Approval Recognition
